SUMMARY

BBA student graduating in 2026, with three internships spanning business development, digital marketing, and student leadership. Outside coursework, I build independent technical projects — an iOS camera app, a multi-agent AI video pipeline, and a browser-based RPG — and bring the same follow-through to team settings.

EXPERIENCE

Lead — Navista Incubation Center

Jun 2025 – Nov 2025

- Led student teams through project development and incubation activities, from idea validation to pitch prep
- Acted as the main point of contact between founders and student innovators, turning founder feedback into next steps for teams
- Organized events, mentorship sessions, and outreach programs for the incubation cohort

Business Development Intern — Coyolia Technologies

Jun 2025 – Nov 2025

- Worked with the internal team to support outreach and keep the sales pipeline moving
- Communicated directly with clients, adjusting tone and approach for different audiences

Digital Marketing Intern — Brainovision Solutions Pvt. Ltd.

May 2025 – Jun 2025

- Managed content calendars and supported performance marketing campaigns
- Reviewed social media insights to identify what was driving engagement and reach
- Helped plan the AICTE Hackathon, which placed 5th

INDEPENDENT PROJECTS

Raw DNG Camera App (iOS)

- Bypasses Apple's default image pipeline to capture raw DNG frames at 24fps, then converts them into log-style video for color grading

AI YouTube Automation System

- Multi-agent pipeline (research, scripting, editing, upload, analytics) that runs end-to-end video production, mostly on local infrastructure

SkillSwap

- Skills-for-credits marketplace concept with peer-reviewed portfolios, in-app currency, and employer-visible rankings

Browser RPG (in progress)

- Pokémon-style narrative game that teaches video editing through its story
